A2 subjects in order of preference

It is most important that options are listed **in order of preference** as this is taken into account in the determination of the subject blocking system.

Pupils currently studying **express mathematics, geology** or any other **subject with special arrangements** should refer to the notes overleaf.

Choices indicated on the form **should be considered as final**; once the timetable has been completed there is no guarantee that requests for changes received after that can be accommodated.

First choice	
Second choice	
Third choice	

At Arnold it is unusual for pupils to continue with four subjects to A2: pupils who have good reasons for wishing to pursue four A2 subjects should discuss the advisability and feasibility of this with Mr Jenkinson, Director of Studies, before Thursday 12th February.

NOTES

1. Pupils currently studying mathematics at A2 level in the lower sixth have one of the following three options:
 - i. Select further mathematics at AS level as one of the three option choices, leaving two more option choices to be filled.
 - ii. Select further mathematics at AS level as one of the three option choices and further mathematics at A2 level as another one of the three option choices, leaving one more option choice to be filled.
 - iii. Do not continue with mathematics in the Upper Sixth and select remaining AS subjects to be studied further at A2 level.

Please note that further mathematics may have a reduced curriculum allocation, dependent upon the needs and ability of pupils involved.

2. Pupils currently studying geology at AS level in the lower sixth should select geology as one of their three A2 options if they wish to study it further.
3. Pupils currently studying any other subject outside of the normal curriculum provision (in other words special tuition is being provided on a one-to-one basis or in very small groups in special circumstances) should select this subject as one of their three A2 options if they wish to study it further.
